Note: All non-critical commercial and industrial users will be included in the above classification that most closely represents the wastewater discharge strength and characteristics in comparison with the domestic wastewater definition in the Regulations, as determined by the Director of Public Works. The UCC designation of a particular industry may not necessarily correspond to the Standard Industrial Classification (SIC) assigned for other purposes.

Unclassified and Critical User Rates

Critical users and those whose discharge does not correspond to any UCC because of variations in wastewater constituents or treatment costs shall pay an amount calculated in accordance with the following formula, where:

$$C = V/M (160 C_V + C_B \times BOD + C_S \times SS)$$

C = Sewer service charge during period for which billing is calculated

V = Volume of water consumed in hundred cubic feet (CCF) during period for which the billing is calculated (total of public water service, metered flow, and all private sources, except those meters or services specifically identified for irrigation only)

BOD = Average Biochemical Oxygen Demand, in milligrams per liter, from user during period for which the billing is calculated

SS = Average Suspended Solids, in milligrams per liter, from user during period for which the billing is calculated

	Eff. Oct 1, 2013	Eff. Oct 1, 2014
C _V = Treatment cost per CCF of water	\$2.26	\$2.34
C _B = Treatment cost per pound of BOD	\$0.61	\$0.65
C _S = Treatment cost per pound of SS	\$0.84	\$0.75

M = 160 for users with separate irrigation meter and 178 for users without separate irrigation meter

The minimum fee for each user shall be that established for one (1) service unit per month
